

ANNOUNCEMENT

Browning Bushing Guards for Shaft Mounted Gearing Products

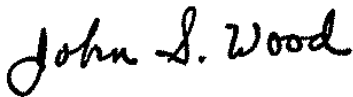

Emerson Power Transmission is pleased to announce the addition of bushing guards for improved guarding of Browning shaft mounted gearing products. Bushing bolts are catch points and many customers fabricate their own guarding. Emerson Power Transmission has developed off-the-shelf kits for bushing guarding.

Currently available for the following Browning shaft mounted products:

- TorqTaper Plus shaft mount sizes 107-315
 - OtN (helical-bevel) sizes OtN 32-35
 - MbN (high ratio shaft mount) MbN 32-35
 - HwN (helical-worm) HWN 32-35
-
- One kit guards both ends
 - Customer trims to shaft size
 - Guards may be installed after reducer is mounted on driven shaft

For additional information, contact Application Engineering at 800-626-2093.
